

|            | Task Info                                                                                                                                                                                                                                                                                                                        |  | Project | Hours Spent |
|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|---------|-------------|
| 30/12/2022 | Worked on mortgages module record visibility for all users by data sharing validation sharing rule (Criteria is stage is Rate Proposal in module Mortgages)                                                                                                                                                                      |  | Eric    | 2           |
| 02/01/2023 | Implemented Data Sharing Rule for Borrowers Module and Mortgages Module in sandbox version of Eric live instance and also update SC Date, BC Date, Closing Date of mortgages when the appropriate stages and contact stages are changed in both mortgages and borrowers module                                                   |  | Eric    | 5           |
| 03/01/2023 | Implemented underwriter profile user, realtor profile user and apply the data sharing rule in test instances created by me and shown the implemented works to Eric in evening                                                                                                                                                    |  | Eric    | 4           |
| 04/01/2023 | Worked on populate reason for unqualified when the stage is moved to unqualified                                                                                                                                                                                                                                                 |  | Eric    | 2           |
| 04/01/2023 | Tried to change the stage option for underwriter profile in Kanban View. But if we change anything in kanban view settings it will reflect in all profiles                                                                                                                                                                       |  | Eric    | 2           |
| 04/01/2023 | Tried to implement the kanban view in canvas view. But in Canvas view only current stage is coming instead of all stages                                                                                                                                                                                                         |  | Eric    | 2           |
| 05/01/2023 | Implemented displaying chosen borrower information in Mortgages module in the client information section of mortgages using client script for create and edit page of mortgages module                                                                                                                                           |  | Eric    | 3           |
| 06/01/2023 | Implemented Populate customer rating field from Mortgages module to Borrowers module                                                                                                                                                                                                                                             |  | Eric    | 2           |
| 06/01/2023 | Implemented Unqualified and Not interested popup through layout rule and has to be done in both Borrowers and Mortgages module                                                                                                                                                                                                   |  | Eric    | 2           |
| 07/01/2023 | Implemented Client Script for loading client information of mortgage module from borrower module during onload of Mortgage module from borrower module. Almost finished all the mapping from borrower module to client information of mortgage module during create page, edit page and onload of create page of mortgage module |  | Eric    | 4           |
| 09/01/2023 | Deployed all the workflows and layout rules implemented in sandbox instance Eric to the live instance of him                                                                                                                                                                                                                     |  | Eric    | 3           |
| 11/01/2023 | While update the stage field of mortgage module and mortgage stage field of borrower module is updated through workflow in Mortgages module                                                                                                                                                                                      |  | Eric    | 2           |
| 11/01/2023 | Realtor Commissions Field of Borrower module is update when the Current Value of property value of borrower module is updated during creation and updation of borrower module using client script                                                                                                                                |  | Eric    | 2           |
| 11/01/2023 | Realtor Commissions Field of Borrower module is update when the Current Value of property value of borrower module is updated during updation of borrower module by workflow using deluge script                                                                                                                                 |  | Eric    | 2           |
| 13/01/2023 | Implemented the workflow to update the contact stage to leads to mortgage when the mortgage is created from borrower module                                                                                                                                                                                                      |  | Eric    | 2           |
| 16/01/2023 | Implemented the workflow to update cashin date based on closing date of mortgage module                                                                                                                                                                                                                                          |  | Eric    | 2           |
| 17/01/2023 | Implement Update Cashin and Update Realtor Commissions mass update button in Mortgage and Borrower module to update cashin date and realtor commissions based on closing date and current value of property for existing records                                                                                                 |  | Eric    | 2           |
| 21/01/2023 | Updated Cashin Realtor Date based on after 30 days of closing date of borrower module while creating or editing the borrower module record                                                                                                                                                                                       |  | Eric    | 1           |
| 23/01/2023 | Closing Date will be updated automatically only if closing date is empty and stage is updated to Mortgage Closed                                                                                                                                                                                                                 |  | Eric    | 1           |
| 23/01/2023 | Cashin Date will be updated automatically only if Cash in Date is empty                                                                                                                                                                                                                                                          |  | Eric    | 1           |
| 23/01/2023 | Update the Submit Date, SC Date, CA Date and BC Date only the field is empty in the mortgage module                                                                                                                                                                                                                              |  | Eric    | 1           |
| 23/01/2023 | Update the Zoom Meeting Date, PA request date, PA approved date, Visit Start Date, Offer accepted date and purchase complete date but don't update it if it has date field in it borrower module                                                                                                                                 |  | Eric    | 1           |
| 06/02/2023 | Update two workflows for updating the current user as mortgage owner if the user update the mortgage stage and his profile is Agent                                                                                                                                                                                              |  | Eric    | 2           |
| 07/02/2023 | Created workflow to post the borrower module data of Zoho CRM to Five9 CRM                                                                                                                                                                                                                                                       |  | Eric    | 1           |
| 08/02/2023 | Updated Realtor commissions of Borrower module in create and edit of borrower module record using workflow                                                                                                                                                                                                                       |  | Eric    | 1           |
| 08/02/2023 | Updated List of Realtor Commissions on Borrower module using mass update button                                                                                                                                                                                                                                                  |  | Eric    | 1           |
| 08/02/2023 | Changed Invoke URL mass detail view button of Book Meeting QC-FR, Book Meeting Qc-En, Booking JP, Booking Maisser, Booking Freddy, Booking Hibah, Booking Meeting ON-EN in Mortgage module                                                                                                                                       |  | Eric    | 1           |
| 09/02/2023 | for current user with profile mortgage brokers (Profile: Agent) ONLY, is make it as a mortgage owner when they move a client from stage (application pending; collecting documents; partial documents; documents received)                                                                                                       |  | Eric    | 1           |
| 09/02/2023 | Shown demo to Tony by doing it by himself because we don't have permission to change the user profile. Current User with profile Agent move it as a mortgage owner when the stage of mortgage module is moved to any of these (application pending; collecting documents; partial documents; documents received).                |  | Eric    | 1           |

|            | Task Info                                                                                                                                                                                                                                                                                                       |  | Project | Hours Spent |
|------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|---------|-------------|
| 22/02/2023 | Completed Five9 Sync from borrower module in Detail View and List View of borrowers by whatever we discussed with tony in yesterday's call                                                                                                                                                                      |  | Eric    | 2           |
| 23/02/2023 | Completed Five9 Sync from mortgage module in Detail View and List View of mortgages using detail view button and mass update button                                                                                                                                                                             |  | Eric    | 2           |
| 24/02/2023 | Added some of the fields in field mapping of Five9 and Zoho. List the mapped fields of Five9 and zoho for borrower and mortgage modules                                                                                                                                                                         |  | Eric    | 2           |
| 27/02/2023 | Added multi line field of Notes for Not Intereted and Notes For Unqualified both are populated when mortgage stage of mortgage module is moved to Not Interested or Unqualified                                                                                                                                 |  | Eric    | 1           |
| 27/02/2023 | Added stages Pre-Approval,Review before Submit,Not Interested,Unqualified,Contact in Future in the workflow move the user as mortgage owner if the user profile is Agent                                                                                                                                        |  | Eric    | 1           |
| 28/02/2023 | Added custom fields Notes For Unqualified and Notes For Interested in borrower module. Added those fields in layout rule of borrower module. It will auto populate when we move the borrower module contact stage to Unqualified or Not Interested                                                              |  | Eric    | 1           |
| 28/02/2023 | Auto populate the borrower module fields of Type of product, contact stage in mortgage module using client script while clicking the +icon of mortgage in borrower and by choosing the borrower name lookup field in mortgage module                                                                            |  | Eric    | 2           |
| 28/02/2023 | Shown demo for Eric using two small videos for the above two methods of auto populating borrower details in mortgage module                                                                                                                                                                                     |  | Eric    | 1           |
| 28/02/2023 | Updating the type of product and contact stage of borrower module that is related with choosen mortgages are updated using mass update button in list view of mortgages (Update Related Borrower Detail)                                                                                                        |  | Eric    | 1           |
| 28/02/2023 | Sync the created or edited borrowers or mortgages are synced to Five9 after 10 minutes using workflows                                                                                                                                                                                                          |  | Eric    | 1           |
| 02/03/2023 | Small two video demos for Eric for auto populating related borrower details in mortgage module in three ways one is by clicking the +icon of mortgages in the related list of borrower module and another two is by changing the look up field of borrower name in the create and edit page of mortgage module. |  | Eric    | 1           |
| 03/03/2023 | Created and added this fields in layout rule of borrower and mortgage Reason for Fake Leads, Notes for Fake Leads, Reason for Contact in Future, Notes for Contact in Future                                                                                                                                    |  | Eric    | 2           |
| 10/03/2023 | Mapped Property Value, Current Mortgage Balance, Credit Score, Mortgage (Purchase/Renewal) while creating mortgage from borrower module in create, edit page in client script                                                                                                                                   |  | Eric    | 2           |
| 10/03/2023 | Created Reason Notes for Unqualified, Not Intrested, Fake Lead, Contact In Future in both borrower and mortgage module and added it in notes section under the modules for each entry                                                                                                                           |  | Eric    | 2           |
| 13/03/2023 | When we update review before submit stage of morgage need to collect the purpose of file, property tenure, requested rate/product, rate, mortgage type, term, property tax amount and more fields                                                                                                               |  | Eric    | 3           |
| 14/03/2023 | Created Widget UI for getting details of review before submit mortgage stage and completed mandatory check                                                                                                                                                                                                      |  | Eric    | 4           |
| 15/03/2023 | Completed dependency fields and its mandatory check and added the collected details in the widget in notes section of mortgage                                                                                                                                                                                  |  | Eric    | 3           |
| 16/03/2023 | Worked on Rate Proposal Widget to update Rate Offered Field and update the stage to Rate Proposal and fixed the issue in sending email for documets need to submit while Rate Proposal widget is updated                                                                                                        |  | Eric    | 5           |
| 21/03/2023 |                                                                                                                                                                                                                                                                                                                 |  | Eric    | 2           |
| 22/03/2023 | Fixed sent email from address issue in Rate Proposal widget                                                                                                                                                                                                                                                     |  | Eric    | 5           |
| 24/03/2023 | Fixed issue in triggering workflow while update the stage Rate Proposal and Review before Submit in Mortgage module through widgets                                                                                                                                                                             |  | Eric    | 2           |
| 27/03/2023 | Try to fix email sent issue in Rate Proposal widget in Tony instnace but couldn't fix it event contacting live chat support. Raised support through email                                                                                                                                                       |  | Eric    | 2           |
| 28/03/2023 | Meeting with Tony to get screenshots of his Email Configuration IMAP/POP, Organization Eamils, From Email Addresses in compose Email for sending reply to raising the support through email to Zoho                                                                                                             |  | Eric    | 1           |
| 29/08/2023 | Populate Call Back Date in both mortgage and borrower module while update the stage and contact stage to contact in future                                                                                                                                                                                      |  | Eric    | 1           |
| 27/04/2023 | Synced Language of Borrower and related mortgages stages of Borrower module to Five 9                                                                                                                                                                                                                           |  | Eric    | 2           |
| 09/05/2023 | Fixed Send Email from info@wiseday by setting org_email as true                                                                                                                                                                                                                                                 |  | Eric    | 2           |
| 23/01/2023 | Closing Date of mortgage will be updated automatically only if closing date is empty and stage is updated to Mortgage Closed                                                                                                                                                                                    |  | Eric    | 1           |
| 23/01/2023 | Cashin Date will be updated automatically only if Cash in Date is empty and Closing date of mortgage is changed to any value                                                                                                                                                                                    |  | Eric    | 1           |
| 23/01/2023 | Created two workflows for create and edit to populate_mortgages_date inorder to restrict the calling of function under it unwantedly                                                                                                                                                                            |  | Eric    | 1           |
| 23/01/2023 | Created two workflows for create and edit to populate_borrowers_date inorder to restrict the calling funtion under it unwantedly                                                                                                                                                                                |  | Eric    | 1           |

|            | Task Info                                                                                                                 |  | Project | Hours Spent |
