SOFTWARE COMPANY PROJECTS

SMACKCODERS INC PROJECTS

WP Ultimate CSV importer – React

[Project url](#)

WordPress plugin to import posts, pages and users through csv, xml and google sheets. Main use of this plugin is to export posts, pages and users of the desired WordPress site as csv, xml or JSON and import it to the new WordPress site as csv, xml or google sheet. My role in this project is developing the front-end using React framework.

CRM Connector Plus – React

[Project url](#)

WordPress plugin to capture leads from WordPress to desired CRM as lead or contact module. With the help of contact form, ninja form or default form users could capture the lead detail and transfer it to the VtigerCRM, SuiteCRM, SugarCRM, JoforceCRM, ZohoCRM and SalesforceCRM as contact or lead module. My role in this project is developing the front – end using React framework.

Tools Engine AIO Custom Fields – React

[Project url](#)

This WordPress plugin creates custom fields for WordPress. With the help of this plugin we could create custom fields like gallery, repeater, image, text, textarea and so many fields. Users could use these fields in the front of the WordPress site for their desired things. My role in this project is developing the front – end using React framework.

All-in-one Performance Accelerator – React

[Project url](#)

WordPress plugin accelerates the performance of the WordPress Site. This WordPress plugin improves the performance of the WordPress by using CDN and lazyload concepts. My role in this project is developing the front – end using React framework.

Weight-Based Cart Price Updater for WooCommerce -PHP

Developed a one-page WordPress plugin for a customer to update the WooCommerce cart price based on the weight of the selected products, ensuring dynamic and accurate pricing.

Web Page Display via Shortcodes for WordPress Themes - PHP

Developed a one-page WordPress plugin that allows displaying a web page within selected WordPress themes using shortcodes, providing seamless integration and flexibility for content display.

DocuSign Quote Signer for Vtiger CRM - PHP

Developed a Vtiger CRM extension that integrates DocuSign with the Quote module. This extension allows salespeople to seamlessly send quotes for signing with a single click using the **"Send Quote"** button in the Quote module's detail view, streamlining the document signing process.

TECHIESAROUND PROJECTS

Zoho Workdrive Extension for Zoho CRM - React

The Zoho WorkDrive Extension enables seamless creation, updating, and deletion of files and folders from Zoho CRM to Zoho WorkDrive. Developed using **React JS** and **Deluge scripting**, this extension ensures smooth file management and integration between Zoho CRM and WorkDrive.

Google Drive Extension for Zoho CRM - React

The **Google Drive Integration for Zoho CRM** extension allows users to seamlessly create, update, and delete files and folders from Zoho CRM to Google Drive. Built using **React JS** and **Deluge scripting**, this extension ensures efficient file management and smooth integration between Zoho CRM and Google Drive.

AI Email Intelligence for Zoho CRM - React

Developed an AI-powered email intelligence extension for Zoho CRM that analyzes customer email conversations to generate summaries, extract follow-up tasks, and draft reply suggestions directly within CRM records. Improved sales productivity by enabling faster email understanding and response without leaving the CRM interface.
